## Performance Evolution <sup>1</sup>

## Market Commentary

In February, the Fund increased by 0.40%, while its benchmark rose by 0.30%. The S&P Mauritius Sovereign Bond Index recorded a return of -2.38%.

The Monetary Policy Committee (MPC) of the Bank of Mauritius raised the Key Rate by 0.50%, from 4.00% to 4.50%. This decision reflects the need to manage inflation risks and support exchange rate stability amid global economic uncertainties. Headline Inflation reached 2.80% for the 12 months ended February 2025. The Index grew by 0.10% YoY in February, lower than the 1.90% registered last month. The 1-year Government of Mauritius T-Bill yielded 5.19%, while the 7-year Government of Mauritius Bond closed at 5.60%.

Moody's has revised the outlook for MCB and ABSA Mauritius from "stable" to "negative," citing that the negative outlook aligns with the country's "negative" outlook. This may signal a potential weakening of the government's capacity to support these banks, should it become necessary.

On the foreign exchange front, the EUR, GBP, and USD depreciated by 1.25%, 0.90%, and 1.72%, respectively, against the MUR. In February 2025, the Bank of Mauritius did not intervene in the domestic foreign exchange market.
