Market Commentary

In October, the Fund posted a return of 1.00%, while its benchmark rose by 0.40%. The S&P Mauritius Sovereign Bond Index recorded a return of 0.50%.

At its meeting held in November 2025, the Monetary Policy Committee (MPC) of the Bank of Mauritius decided to maintain the Key Rate at 4.50% per annum. It was highlighted that Mauritius grew by 3.6% in Q2 2025, driven mainly by key sectors, namely 'Financial and insurance activities', and 'Accommodation and food service activities'. However, overall economic activity was partly dragged down by contractions in the 'Construction' and 'Public administration and defence' sectors. The Bank forecasts real GDP growth of 3.1% in 2025, slightly higher than earlier estimates, and 3.0% in 2026, subject to downside risks.

Headline Inflation reached 3.5% for the 12 months ended October 2025. The Index grew by 4.1% YoY in October, lower than the 4.4% registered last month. The 1-year Government of Mauritius T-Bill yielded 4.97%, while the 7-year Government of Mauritius Bond closed at 5.34%.

On the foreign exchange front, EUR and GBP depreciated by 1.0% and 1.7% respectively against the MUR while the USD appreciated by 0.3% vis-à-vis MUR. The Bank of Mauritius intervened thrice in the domestic foreign exchange market, selling USD 45 million at an average rate of MUR 45.22 per USD.
