Fund Evolution vs Benchmark (since inception)

Portfolio Commentary

The Fund delivered a return of -5.7% for the month, outperforming the benchmark return of 1%. The portfolio delivered a strong performance in August 2026, supported by broad-based gains across market-cap segments. Performance was led by Ather Energy, One 97 Communications and PTC Industries, which benefited from strong stock-specific momentum. Mid-cap and small-cap holdings were the primary drivers of returns, while large caps also contributed positively. Performance was partly offset by weakness in Jain Resource Recycling, Aegis Vopak Terminals and Onesource Specialty Pharma, with Metals & Mining representing the largest sector detractor. All market capitalisations had negative contributions. On a sectorial allocation, Oil & Gas, Consumer Services and Metals & Mining were barely positive with the remaining being negative contributors.
